Institut Français de la Vigne et du Vin - IFV

Link to content

https://agrifoodtef.eu/services/data-labelling-ai-detection-purposes-vineyard

Type of Sector

Viticulture

Accepted type of products

Data, Design / Documentation

Type of service

Data augmentation

Description

You can provide your own dataset, without labels, or ask us to build the dataset and label it so you can train an AI model. Labelling can be made with your own tools or not, online or offline, it can be segregation or segmentation.

How can the service help you

This service may help you if you need experts to label complex images or datasets in a very specific field.

How the service will be delivered

This service is delivered after we've agreed on the number/size of the dataset to label and a realistic deadline.

Service customisation

Our objective is to provide the greatest possible flexibility in our services, and we look forward to discussing your specific requirements.
